

The Centerville Water System makes every effort to ensure that our customers enjoy a continuous supply of safe drinking water. We appreciate the help of our customers to maintain the quality of our water supply.

Cross Connections can cause the water system to become contaminated. A cross connection is a link with the public water supply and a possible source of contamination. An example of a cross connection would be a garden hose submerged in a source of contamination such as a swimming pool, car radiator or other liquid. If a water main break should occur or if a fire pumper used a fire hydrant while the hose was submerged in a source of contamination, the contaminant could be pulled back into the public water supply. This occurrence, known as backflow, can be prevented.

One simple way to stop backflow is by using an air gap. An air gap can be created by arranging your hose so that the end is at least six inches above the top rim of the container it is being used to fill. This air gap will prevent the contaminant from being siphoned into the water supply.

Another method of preventing backflow with a garden hose is using a device known as a vacuum breaker. Vacuum breakers are inexpensive devices that can be screwed onto your outside faucet. These devices will prevent contaminants from being siphoned back into your plumbing and the public water system.

With Commercial and Industrial there are more chances of hazardous materials entering the water system which needs more attention. Hazardous cross connections or cross connections created with permanently installed plumbing may require more sophisticated devices known as reduced pressure backflow preventers. These devices are much more complicated and must be tested annually by certified testers.

Some potential cross connections in Commercial and Industrial are: Chemical tanks, Boilers, Sprinkler systems, Irrigation systems, Baptismal pools, Utility sinks just to name a few.

Help us the Town of Centerville Water System make our water the safes water in Tennessee. For more information on preventing cross connections and protecting our water supply, contact the Town of Centerville Water System at 931-729-4246

WELL & SPRING USER AGREEMENT

In accordance with Town Of Centerville's Cross Connection Control Program, a private well, spring, or auxiliary water source may not be connected in any manner to the public water supply system unless proper protection against cross connection is provided. A Reduced Pressure Backflow Device may be used for protection. These devices must have prior approval by the Town Of Centerville and must be checked annually either by the Town of Centerville or a person with a Cross Connection Certification.

And a record kept of such devices at Town Of Centerville. Customers not in compliance with this rule will have their water service either not connected or discontinued.

Check appropriately below:

This serves as notification that a well and/or spring is connected on the property at the following address:

This serves as notification that a well and/or spring is not connected on the property at the following address:

Please type or print _____

I understand and agree that this system is, and shall remain tollally segregated from the public water supply, and no unapproved or unauthorized cross connections, auxiliary intakes, bypasses, or interconnections will be permitted without the written approval of the Town Of Centerville.

I further understand and agree that should an auxiliary water supply be connected to the public water system at the above address, maximum cross connection control equipment in the form of a reduced pressure backflow device shall be installed to protect the public water supply.

1. Do you have? (Please Check all that apply):
- | | | |
|--|---|--|
| <input type="checkbox"/> Hot Tub | <input type="checkbox"/> Swimming Pool | <input type="checkbox"/> Jacuzzi |
| <input type="checkbox"/> Waterbed | <input type="checkbox"/> Solar System | <input type="checkbox"/> Green House |
| <input type="checkbox"/> Underground Sprinkler System | <input type="checkbox"/> Darkroom Equipment | <input type="checkbox"/> Drip/Soaker/Irrigation System |
| <input type="checkbox"/> Portable Dialysis Machine | <input type="checkbox"/> Insecticide Sprayers (That attach to garden hose also) | <input type="checkbox"/> Utility sink w/threaded faucet |
| <input type="checkbox"/> Wood burning hot water heater | <input type="checkbox"/> Ghost pipes (unidentified) | <input type="checkbox"/> Other source (spring, well, etc.) |
2. Do you have bathtub that fills from the bottom? Yes No
3. Do you have a water softener or any extra water treatment system? Yes No
4. Do you have an auxiliary water supply on your premises? Yes No
5. Do you have livestock and use a water trough or water system connected to by public water? Yes No
6. Is your home or building elevated above your water meter? (Example home located on hill and meter at base) Yes No
7. Do you have a creek, river, spring, or well on your property? Yes No
8. Do you have a booster pump, well pump, or any other type water pump? Yes No
9. Do you receive irrigation water from a different source? Yes No
10. Do you have a backflow protection device on your property now? Yes No
11. Do you have any situation that you are aware of that could create a cross-connection? Yes No
12. Do you have any other water-using equipment on your property not mentioned above? Yes No

If yes, please list below:

Print Name _____

Phone # (include area code) _____

Signature _____

Date _____

Please notify this office if you answer yes to any of the questions and/or if you have checked any box in Question 1. If any of the above conditions have changed contact the Centerville Water System, at 931-729-4246, Please advise the call taker you're calling in reference to this survey or mail to attention Centerville Water System Survey P.O. Box 238 Centerville, TN 37033.
